

## **Installing the LG Bluetooth headsets on the 1000! Range**

Headset once setup in charge position:

- The lifter (EHS) will come screwed on to the stand for the headset

Remove the EHS Unit from stand with 2 screws

- Attach the EHS unit to the stand that has come with the handset – as below you will see the EHS adapter connected with two screws and a grey ribbon, this connects into the base of the handset

- Connect the long black cable from the EHS unit to the headset base

The smaller clear connector connects into the EHS unit and the larger clear connector into the headset base.

- Connecting the audio lead from headset to handset

...Headset port on handset...

- Changing EHS to SIP – SWITCH FROM Default IPKTS to SIP on EHS unit
